

- CONTENTS -

Chapter I	Scope and aim of the thesis	9
Chapter II	General introduction: cellular targets involved in the anti-inflammatory effects of ketamine – a literature review	15
Chapter III	Ketamine inhibits LPS-induced tumour necrosis factor-alpha and interleukin-6 in an equine macrophage cell line	71
Chapter IV	Characterisation of the cytokine-modulating activity of ketamine in an equine macrophage cell line following endotoxin exposure	81
Chapter V	Effects of ketamine on inducible nitric oxide synthase expression and nitric oxide synthesis in an equine macrophage cell line following LPS exposure	101
Chapter VI	Effects of ketamine on LPS-induced cyclooxygenase-2 expression and PGE ₂ production in an equine macrophage cell line	121
Chapter VII	Ketamine reduces production of reactive oxygen species in an equine macrophage cell line following stimulation with LPS and PMA	141
Chapter VIII	Pharmacodynamic effects and pharmacokinetic profile of a long-term continuous rate infusion of racemic ketamine in healthy conscious horses	157

Chapter IX	Investigation of the anti-inflammatory effects of ketamine in a tissue chamber model in Shetland ponies	187
Chapter X	Summarising discussion and conclusions	205
	Nederlandse samenvatting	221
	Dankwoord	231
	Curriculum Vitae	237
	List of abbreviations	239
