

CONTENTS

Chapter 1	General introduction	7
Chapter 2	Characterisation of host responder types after a single <i>Cooperia oncophora</i> infection: kinetics of the systemic immune response	29
Chapter 3	Immune expulsion of the trichostrongylid <i>Cooperia oncophora</i> is associated with increased eosinophilia and mucosal IgA	49
Chapter 4	Priming dose level and host responder type differentially affect establishment, length and fecundity of <i>Cooperia oncophora</i> in re-infected calves	65
Chapter 5	B cells and antibodies differentially influence immunity to <i>Cooperia oncophora</i> depending on priming dose level and host responder type	83
Chapter 6	T-cell mediated immune responses in calves primary infected or re-infected with <i>Cooperia oncophora</i> : similar effector cells but different timing	107
Chapter 7	Summarizing discussion	127
