Chapter 1	Introduction	1
Chapter 2	Effect of Antithymocyteglobulin on quantitative immune recovery and graft-versus-host disease after partially T cell depleted bone marrow transplantation: a comparison between recipients of matched related and matched unrelated donor grafts <i>Transplantation 2003; 75: 1910-1913</i>	11
Chapter 3	Antithymocyteglobulin as prophylaxis of graft failure and graft-versus-host disease in recipients of partially T cell depleted grafts from matched unrelated donors: a dose finding study <i>Experimental Hematology; in press for publication in November 2003</i>	23
Chapter 4	Epstein-Barr virus (EBV) reactivation is a frequent event after allogeneic stem cell transplantation (SCT) and quantitatively predicts EBV-lymphoproliferative disease following T cell depleted SCT <i>Blood 2001; 98: 972-978</i>	37
Chapter 5	EBV reactivations in recipients of allogeneic partially T cell depleted stem cell transplants: frequently resulting from re-infections with exogenous EBV strains <i>Submitted</i>	59
Chapter 6	Increased incidence of EBV-associated lymphoproliferative disorders after allogeneic stem cell transplantation from matched unrelated donors due to a change of T cell depletion technique <i>Bone Marrow Transplantation 2002; 29: 335-339</i>	77
Chapter 7	Prevention and treatment of Epstein-Barr virus-associated lymphoproliferative disorders in recipients of bone marrow and solid organ transplants: a review <i>British Journal of Haematology 2002; 119: 596-607</i>	89

Chapter 8	Influence of Cytomegalovirus-seropositivity on outcome after T cell depleted bone marrow transplantation: contrasting results between recipients of grafts from related and unrelated donors <i>Clinical Infectious Diseases 2002; 35: 703-712</i>	111
Chapter 9	Influence of Antithymocyteglobulin dose on outcome in Cytomegalovirus-seropositive recipients of partially T cell depleted stem cell grafts from matched unrelated donors <i>British Journal of Haematology 2003; 121: 473-476</i>	129
Chapter 10	Prevention of CMV disease in recipients of allogeneic stem cell transplants: a review <i>Clinical Microbiology Reviews; in press</i>	139
