

Acknowledgements or Dankwords or 致谢:

Finally, I have the chance to write the last part, also the most interesting and difficult part, of my thesis. I am so happy to spend four years in Utrecht, one of the beautiful cities in Holland. Studying in UMCU is the most important period both in my private life and also in my career. There are many people who gave me a lot of help during my study, now, it is the right time for me to say thanks, bedankt or 谢谢(in Chinese) to all of them!

Firstly, huge thanks to my promoter **Hans**. Four years ago, it was you who offered me a PhD position just on my way to Schiphol to take flight back to China. Hans; it was you who also guided me walking into signal transduction research field and showed me how to become a real scientific researcher. I am so impressed with your scientific spirits and that will accompany me in my future research life. I will go back to China after my promotion and hopefully, I can meet you in China in the near future. **Bouderwijn**, when I studied in Wageningen University, I have known your name from my colleagues. However, after meeting you in Utrecht, I realized how smart you are. Football and bird watching are your hobbies; I expect that you can come to Inner Mongolia to watch eagles some day. For sure, the eagles you watch there must be the new specie. **Fried**, also many thanks to you, but I don't know whether that is enough to show my gratitudes. It was you who guided me to make nice Epacs monoclonal antibodies, gave me quite a lot good suggestions on my project and also quite a lot help on revising my thesis. If you have chance to China in the future, please let me know, I will be your host. **Holger**, it is Epac that let us spend four years together. I am so impressed with your work attitudes. You are the model of real scientific researcher. Thanks a lot for your kindly help on my project and also my thesis. I wish you have more papers on Nature or Science in the future. **Leo**, I still remember the talk between us on my very first day in the lab. Maybe, at that moment, the God has already arranged the collaboration between you and me. Thanks for your kindly guidance on my experiments and also help on confocal microscopy. Good luck with your future job. **Magarita**, so nice to share the bench with you and chatting with you now and then, wish you can find a nice job in the near future. **Karen**, did you still remember the problem with your bike's lock when we took dinner together in the centre of Utrecht; that day was your first day in our lab. Hopefully, you still remember the heavy lock which you used in Utrecht even after you start a new job in America. **Tobias**, so impressed with your talent skills on playing tafle-tennis, it seems not easy for Mike to win you within a short period. Good luck with your nice project. **Shannon**, you are a sunny girl in our lab. I am so appreciate with your attitude toward the life. Wish happiness and good luck accompany you forever. **Nadia**, so nice to be a partner of you on the lab routine job list. Thanks a lot for your kindly help on my thesis revising, wish your PDZ-GEF paper will come out soon. **Jurgen**, did you know what is my first impression of you? Your height. I did not know how short I am till I saw you (you know, when I stayed in China, I am always proud of my height). You are so lucky to have **Paulin** as your true love; she is so nice. I am looking forward to see your son in September. **Marta**, I am so lucky to meet you in our lab, your nice personality is really lighting me. No matter where I am, I will keep you in my mind. It is pity that I can not attend your promotion, but I will give you my congratulation from China by mail. **Matthijs**, I am so admired you to have your first paper within the first year of your PhD study. You are so smart and I am sure you will have more papers out in the near future. Good luck with your AF6 story. **Judith**, an open and smart Dutch girl, wish your ARAP3 and SHIP story come out soon. **Easter**, I am wondering whether the worms will come into your dream sometimes. You know, you spend so much time to take care of them. Good luck with your C.elegant project and also house searching. **Martijn**, I am so happy you will stand behind me during my promotion. Thanks a lot for your kindly helping on my thesis and also other things. Good luck with your Epac-Dlg5 project. **William-Jan**, thanks a lot for burning CD for my daughter. No matter where we are, we will keep this CD. Good luck

with your Riam project. **Armando**, so admire you that you have finished your promotion and also got such nice paper on Nature Cell Biology. I will keep my promise to cook Chinese hotpot for you soon. Good luck with your future job in Australia. **Anna**, did you still remember that we stayed in the same room during the lab retreat? At that moment, you started your PhD study for only three days. Time goes so fast, hopefully, nice story come out from your Foxo 4 knock-in mice soon. **Peter**, you are really a lucky guy, you have such a nice project and hopefully you will have a borrel for your first paper before I leave Holland. **Diana**, how about your co-ip between Foxo4 and β -catenin mutants, tries to do that in a sunny day. I believe you will get something soon. **Ajan and Niels**, Mass spectrometry keeps both of you rather busy everyday; hopefully, more interesting projects will come out based on your analyses results. **Marijolein**, if I have chance to teach students how to do western blotting, I will let them know how good your blot is. **Robert**, your special dress and also pony tail will let me remember you forever. **Joost**, a nice and kind big Dutch boy, you have become a cloning technician in our group. I am so impressed by your nice memory on the name of the popular songs. Good luck with your future job. **Lars**, you are a so nice volleyball player, wish you and Anna enjoy the life in the new apartment and also good luck with your Epac project. **Sander**, my nice officemate, I am so happy that you gave us a lot of fun when you stayed in our office room. Good luck with your Mycoplasma test. **Wendy**, I am so lucky to stay in the same office room with you. Best wishes to you and also your lovely twins. **Fons**, thanks a lot for your help on moving my stuff to Hilversum and also driving me to lab trips. Hopefully, I can see you again in China in 2008. **Lydia**, the manager of the lab, I am so impressed with your contributions to the whole lab, best wishes to you and also your family. **Miranda**, although you work in lab only on Friday, but I am still impressed with your nice personality, wish you enjoy the time in lab. **Wim**, it is you who gave me huge help on resolving my computer's problems, thank you very much. **Arnauld, Yumas and Philips**, thanks a lot for kindly help on my computer. **Marjoleine van Santbrink**, thank you for ordering all the stuff which I needed for my experiments. **Breatrix**, although you have already left, I still want to say thanks to your. It is you who help me to settle down in Utrecht. Good luck with your new job. **Cristina, Marianne and Carin**, three of you work in the secretary office, thanks a lot for your kindly help during my studying period. **Jie**, thanks for your nice suggestions on designing the cover of my thesis, now, it really looks nice. **Gianni**, thanks also want to give you for guiding me to do ELISA. **Paul**, thanks also to you for kindly helping me on searching accommodation in Hilversum, hopefully, I can meet you in China in the future. **Viola and Judith**, thanks will also give both of you for the nice immuno EM results. **Livio**, thanks a lot for your kindly help on confocal microscopy. **Sasha**, Good luck with your PhD study. **Maxim**, thanks for supervising yue in the scout club. **Susana and Ben**, Huge thanks to both of you for kindly keeping my daughter in your place now and then, wish happiness accompany your family forever. Finally, many thanks also want to give **Prof. Chinnappa (Prof. C.C.)** who gave me quite a lot of help when I was looking for a PhD position in Canada four years ago.

Next, I will give my thanks to the persons in Wageningen. Prof. **Ton. Bisseling**, you are the first person in Wageningen who I would like to give my huge thanks. Six years ago, it was you who gave me a chance to let me study in your lab, one of the most famous labs in plant molecular biology research field. Best wishes to you and also your family. Hopefully, we still can meet each other in China. **Rene and Erick**, thanks a lot for supervising me when I was studying in your group. Also many thanks to Prof. **Pierre de Wit**, you are the most respectful person for me in the plant-pathogen interaction research field. Thanks a lot for your help when I followed your courses in Wageningen. Although I do not have chance to study in your group, but I still hope we can keep contact each other in the future.
