

EDITORIAL

The obvious reason for writing an Editorial at the start of this particular issue is to celebrate 150 years since the first publication of *Geological Magazine*. This is a long and continuous record of service to the scientific community and contribution to the geosciences. All those people who have been associated with the publication of the journal can be proud of it. I would especially like to acknowledge the efforts of the production teams over the years: behind the academic work of authors, referees and the editors stands a dedicated group of publishing staff, who ensure that the high publication standards of the journal are maintained. Thanks are also due to the authors who have contributed to papers in *Geological Magazine* to date. It is a daunting prospect to think of exactly how many different scientists have co-authored papers in the journal since 1864, and what combinations of evolution and revolution our science has seen in that time.

It is also timely to celebrate the future. *Geological Magazine* has recently appointed 12 new Editorial Board members. It is somewhat of a coincidence that they start at the same time as the 150th anniversary, but entirely a happy one. Their ideas and enthusiasm have already generated new developments in the form of special issues in the pipeline, and the journal will surely gain strength from their contributions. The existing Editors and Editorial Board members remain in place, and will ensure the continuity of the journal.

Finally, let me thank everyone who uses the journal, and builds on the results and conclusions in its papers to take the geosciences forward.

Here is the full Editorial team:

Editor-in-Chief

Dr Mark B. Allen

Durham University, UK

Executive Editors

Dr Graham E. Budd

University of Uppsala, Sweden

Dr Philip T. Leat

*British Antarctic Survey
Cambridge, UK*

Dr Andrew G. Whitham

*CASP
Cambridge, UK*

Editorial Board

Professor Nicholas Arndt

Joseph Fourier University, France

Dr Paul M. Barrett

Natural History Museum, London, UK

Professor Roger Gibson

University of Witwatersrand, Republic of South Africa

Professor John Grotzinger

Caltech, USA

Dr Jon Imber

Durham University, UK

Dr Hugh Jenkyns

University of Oxford, UK

Professor Olivier Lacombe

University Pierre et Marie Curie, France

Professor Xian-Hua Li

Institute of Geology and Geophysics CAS, China

Professor David I. M. Macdonald

University of Aberdeen, UK

Dr K. J. McNamara

University of Cambridge, UK

Dr Guido Meinhold

University of Göttingen, Germany

Professor R. J. Norris

University of Otago, New Zealand

Professor Mark Patzkowsky

Penn State University, USA

Professor Victoria Pease

Stockholm University, Sweden

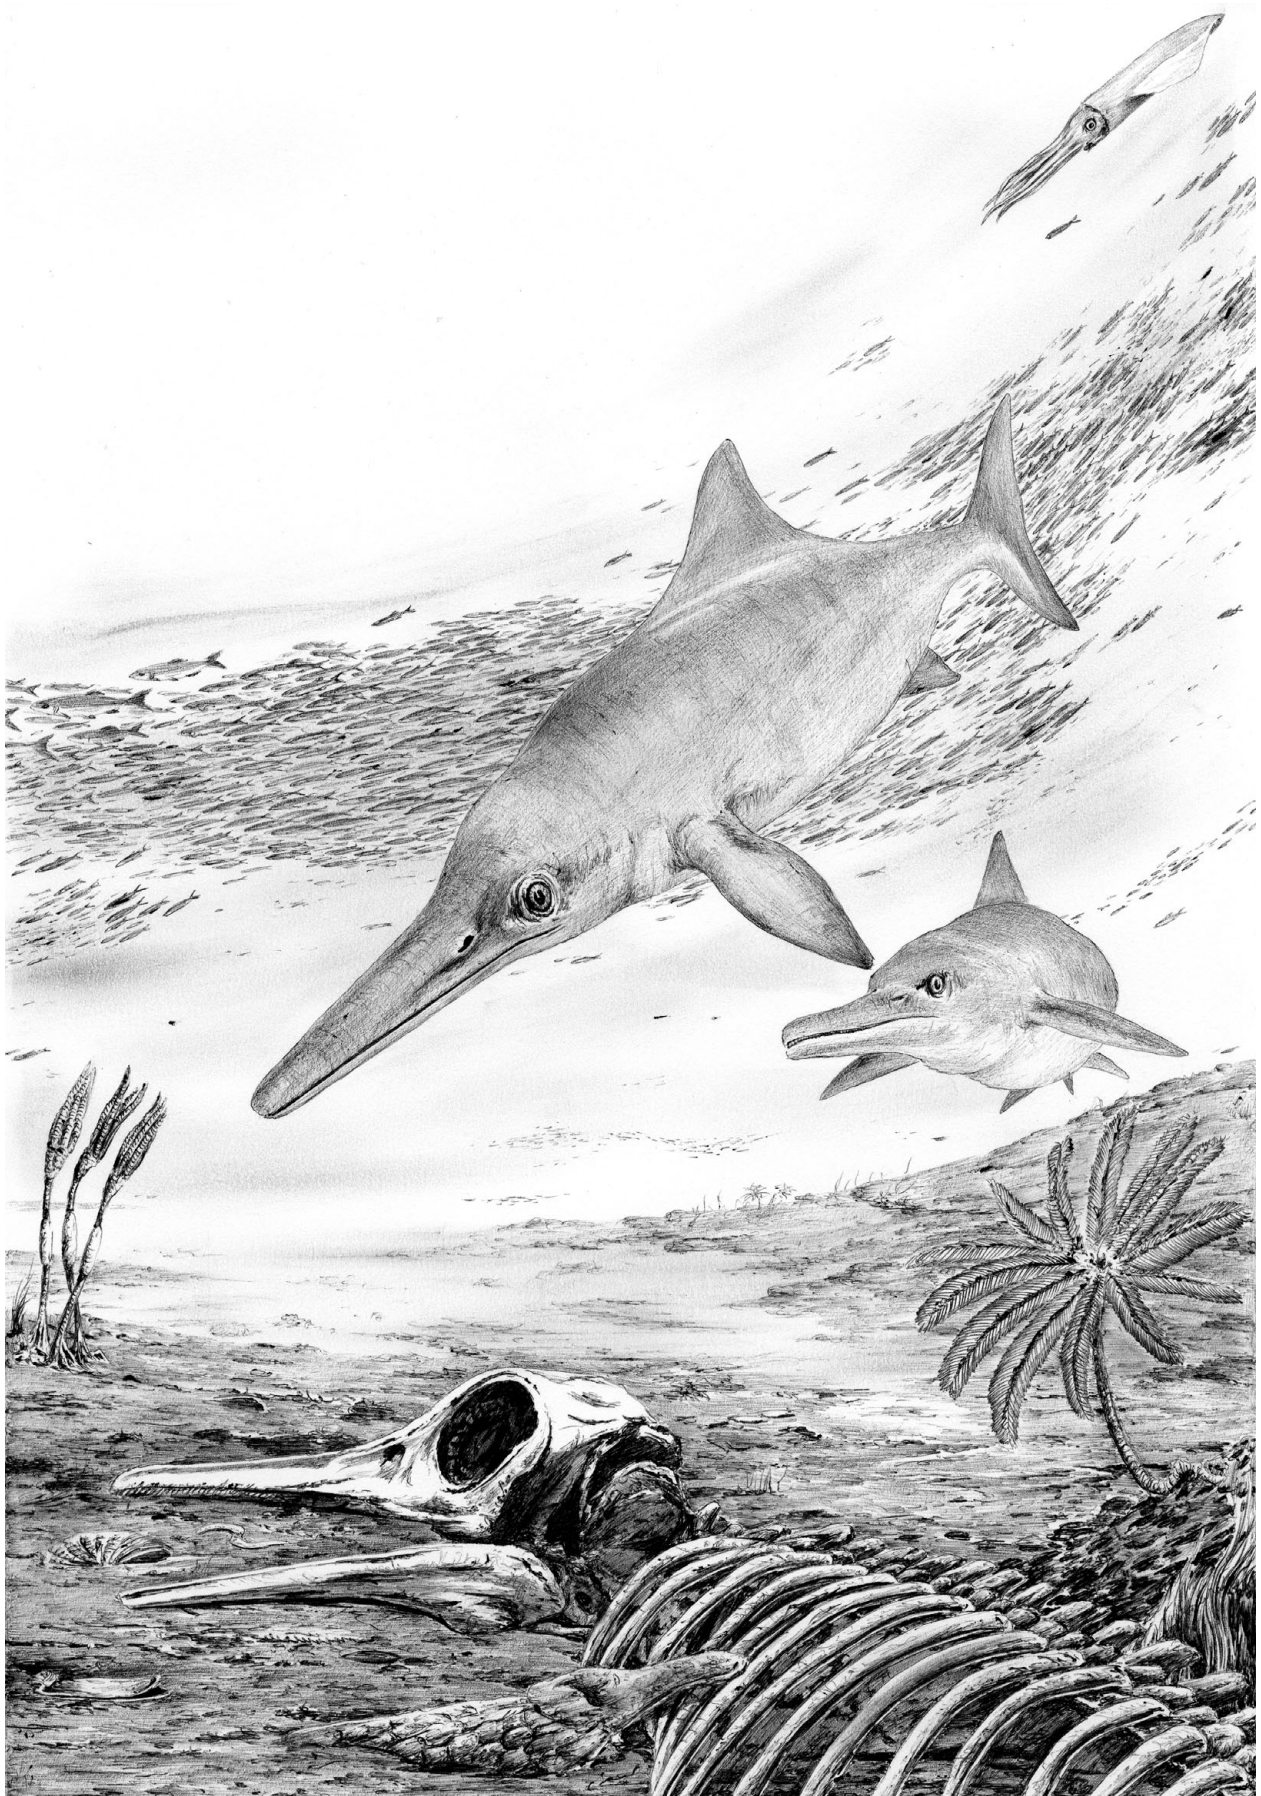

Professor Francisco Sierro

University of Salamanca, Spain

Professor M. P. Smith

University of Oxford, UK

Dr Holly Stein*Colorado State University, USA***Dr Hans-Dieter Sues***Smithsonian National Museum of Natural History, USA***Dr Bas van de Schootbrugge***Utrecht University, Netherlands***Professor Ben A. van der Pluijm***University of Michigan, USA***Dr Paul B. Wignall***University of Leeds, UK***Dr Robert S. Yeats***Oregon State University, USA***Dr Zhaochong Zhang***China University of Geosciences, China***Book Review Editor***Please contact the Editorial Office at
