Koster S, Hensens AG, Schuurmans MJ and van der Palen J. Prediction of delirium after cardiac surgery and the use of a risk checklist. *Eur J Cardiovasc Nurs* 2013; 12: 284–292.

Table 1 appeared incorrectly in the print version of this article. It appears correctly below.

Table 1. Distribution and univariate analysis of all candidate predictors in the total population and among patients with and without delirium.

	Total (n=300)	No delirium (n=248)	Delirium (n=52)	Relative risk	p-value
Age (years) (mean, SD)	70.5	66.7 (9.2)	74.3 (7.1)		<0.001
Euroscore (%) (mean, SD)	4.6 (4.1)	4.0 (3.5)	7.2 (5.6)		<0.001
Age				4.9	<0.001
≥70	138	96	42		
<70	162	152	10		
Sex				1.1	0.83
Male	204	168	36		
Female	96	80	16		
Type of surgery				1	<0.001
CABG	106	98	8		
Valve	118	98	20	2.3	
CABG + valve	52	31	21	5.3	
Other	24	21	3	1.6	
Cognitive impairment	29	13	16	4.2	<0.001
Delirium in history	8	4	4	3.0	0.01
Alcohol use	13	8	5	2.3	0.04
CVA in history	35	23	12	2.3	0.005
Visual impairment	57	43	14	1.6	0.11
Hearing impairment	48	36	12	1.6	0.13
Visual or hearing impairment	86	65	21	1.7	0.04
Internal locus of control	107	91	16	0.8	0.41
Poor nutritional status	3	1	2	4.0	0.08
Anxiety score ≥6	77	65	12	0.9	0.64
Disturbed sodium/potassium	37	30	7	1.1	0.79
Elevated creatinine	43	29	14	2.2	0.005
Anxiety HADS	24	19	5	1.2	0.58
Depression HADS	19	15	4	1.2	0.75
No. of comorbidities					<0.001
1	146	138	8		
2	112	90	22		
3	29	15	14		
4	13	5	8		
Dementia	1	0	1	–	0.17
COPD	32	18	14	3.1	<0.001
Diabetes mellitus	57	43	14	1.6	0.11
Use of heart–lung machine	214	168	46	3.1	0.003
Distress 4DSQ	55	44	11	1.2	0.56
Depression 4DSQ	23	17	6	1.6	0.25
Somatization 4DSQ	55	47	8	0.8	0.55
Anxiety 4DSQ	15	10	5	2.0	0.15

CABG: coronary artery bypass grafting; COPD: chronic obstructive pulmonary disease; CVA: cerebrovascular accident; HADS: Hospital Anxiety and Depression Scale; GDS: Geriatric Depression Scale; SD: standard deviation; 4DSQ: Four-Dimensional Symptom Questionnaire.
