

Corrigendum

Corrigendum to “Optimal design of multi-energy systems with seasonal storage” [Appl. Energy (2017)]

Paolo Gabrielli^a, Matteo Gazzani^b, Emanuele Martelli^c, Marco Mazzotti^{a,*}^a Institute of Process Engineering, ETH Zurich, Sonneggstrasse 3, 8092 Zurich, CH, Switzerland^b Copernicus Institute of Sustainable Development, Utrecht University, Heidelberglaan 2, 3584 CS Utrecht, NL, The Netherlands^c Department of Energy, Politecnico di Milano, Via Lambruschini 4, 20156 Milano, IT, Italy

The authors would like to add one correction and two additions to the original paper:

Correction. The reference [48] in the published manuscript is inaccurate. The correct reference [48], from the same research group, is:

Wang Danhong, Kristina Orehounig, and Jan Carmeliet. 2016. “Dynamic Building Energy Demand Modelling at Urban Scale for the Case of Switzerland.” In *CLIMA 2016 – Proceedings of the 12th REHVA World Congress*. Aalborg, Denmark: Aalborg University. Link: <https://www.dora.lib4ri.ch/empa/islandora/object/empa%3A13618>.

First addition. The specific input data implemented in the paper, which are introduced in Section 2.1 and reported in Fig. 17, are calculated and discussed using the method presented in the following paper, which must be added to the list of references:

Murray Portia, Akomeno Omu, Kristina Orehounig, and Jan

Carmeliet. 2017. “Power-to Gas for Decentralized Energy Systems: Development of an Energy Hub Model for Hydrogen Storage.” In *Building Simulation 2017*. San Francisco, USA: IBPSA International. Link: https://www.conftool.pro/bs2017/index.php/BS2017_Building_Stock_03_3_1460_Murray_2017-08-27_08-08_a.pdf?page=downloadPaper&filename=BS2017_Building_Stock_03_3_1460_Murray_2017-08-27_08-08_a.pdf&form_id=1460&form_version=final.

Second addition. The authors would like to expand the acknowledgement section by thanking Portia Murray, from the Chair of Building Physics, of Prof. Jan Carmeliet, at ETH Zurich, for providing the unpublished input data utilized in this work for the case study, namely those reported in Fig. 17.

The authors would like to apologise for any inconvenience caused.
