

Volume seven

Information booklet <

Imagine scientists, with her and his, butterfly net. Yet these are not butterflies she and he are after. They are (gracefully) hunting down climate-centred narratives - as elusive and beautiful as the rarest of butterflies. And no, he and she will NOT pin them down. They will look at them as they deploy, live, change, and exist. By observing these, with the help of an international interdisciplinary team, they will identify the fabric of local communities' weatherworlds. And from these weatherworlds they will infer the needs for climate services - current and future. This is what CoCliServ is about.

- Duration: 36 months (09/2017 to 08/2020)
- 5 case studies across North-West Europe
- All the results will be open access: scientific results, training materials, suites of protocols for co-construction based on the project implementation

The CoCliServ project benefits from funding obtained through the ERA4CS Joint Call on Researching and Advancing Climate Services Development

with the participation of

Work package 2 Scenario design and development

Co-development of place-based Climate Services for action

#cocliserv

www.cocliserv.cearc.fr

Objectives

Development and testing of a protocol that structures and facilitates the participatory design and analysis of local incremental scenarios (20- and 50-year time horizons)

WP leader

Piloted by Copernicus-UU (Netherlands)

With the participation of CNRS/LSCE (France), HZG (Germany), IASB-BIRA (Belgium), UiB SVT (Norway), ULB/IGEA (Belgium), UniHB (Germany) & UVSQ-CEARC (France)

Activities

- Protocol development for participatory incremental scenario design, focus on testing and experimenting with plans and policies
- Case studies: situation inventories
- Case studies: scenario development and application

Expected results

- Deliverable 2.1: Case study situation inventory report (month 18 / Feb. 2019)
- Deliverable 2.2: Case study scenario and hinge points report (month 24 / Aug. 2019)
- Deliverable 2.3: Ground tested scenario development protocol (month 30 / Feb. 2020)
- Deliverable 2.4: WP2 final report: synthesis of cases, scenarios & hinge points, and lessons learned (month 33 / May 2020)

Milestones

- Milestone 2.1: Draft protocol for WP2 (month 7 / March 2018)
- Milestone 2.2: Protocol test (month 8 / April 2018)
- Milestone 2.3: Implementation plan for WP2 protocol in all sites (month 9 / May 2018)
- Milestone 2.4: Case study inventories completed (month 18 / Feb. 2019)
- Milestone 2.5: WP2 case studies completed (month 24 / Aug. 2019)
