

Announcement

Special Issue on the Behavioural Pharmacology of Cannabinoids

Behavioural Pharmacology 2021, 32:95

Originally, this issue was planned for 2021. As a result of the Covid-19 pandemic, most of us have faced, and still are facing substantial delays in our work. For this reason, we have decided to postpone the Special Issue on the Behavioural Pharmacology of Cannabinoids until the spring of 2022. The silver lining of this delay is that we still welcome submissions for this Special Issue. We therefore invite scientists who have an active interest in cannabinoids and work in the fields of behavioural pharmacology, experimental psychology, behavioural neuroscience and psychiatry to submit

reports of original, unpublished empirical studies, for inclusion in the Special Issue. All papers should be submitted online at www.editorialmanager.com/bpharm. Contributors should aim to submit by the end of August 2021.
