The authors would like to make the following correction. In Figure 8, the bars for the *rxfp* genes, *rxfp2a* and *rxfp2b*, were incorrectly labeled. This figure should be replaced by the following figure. The previous legend of Figure 8 is correct.

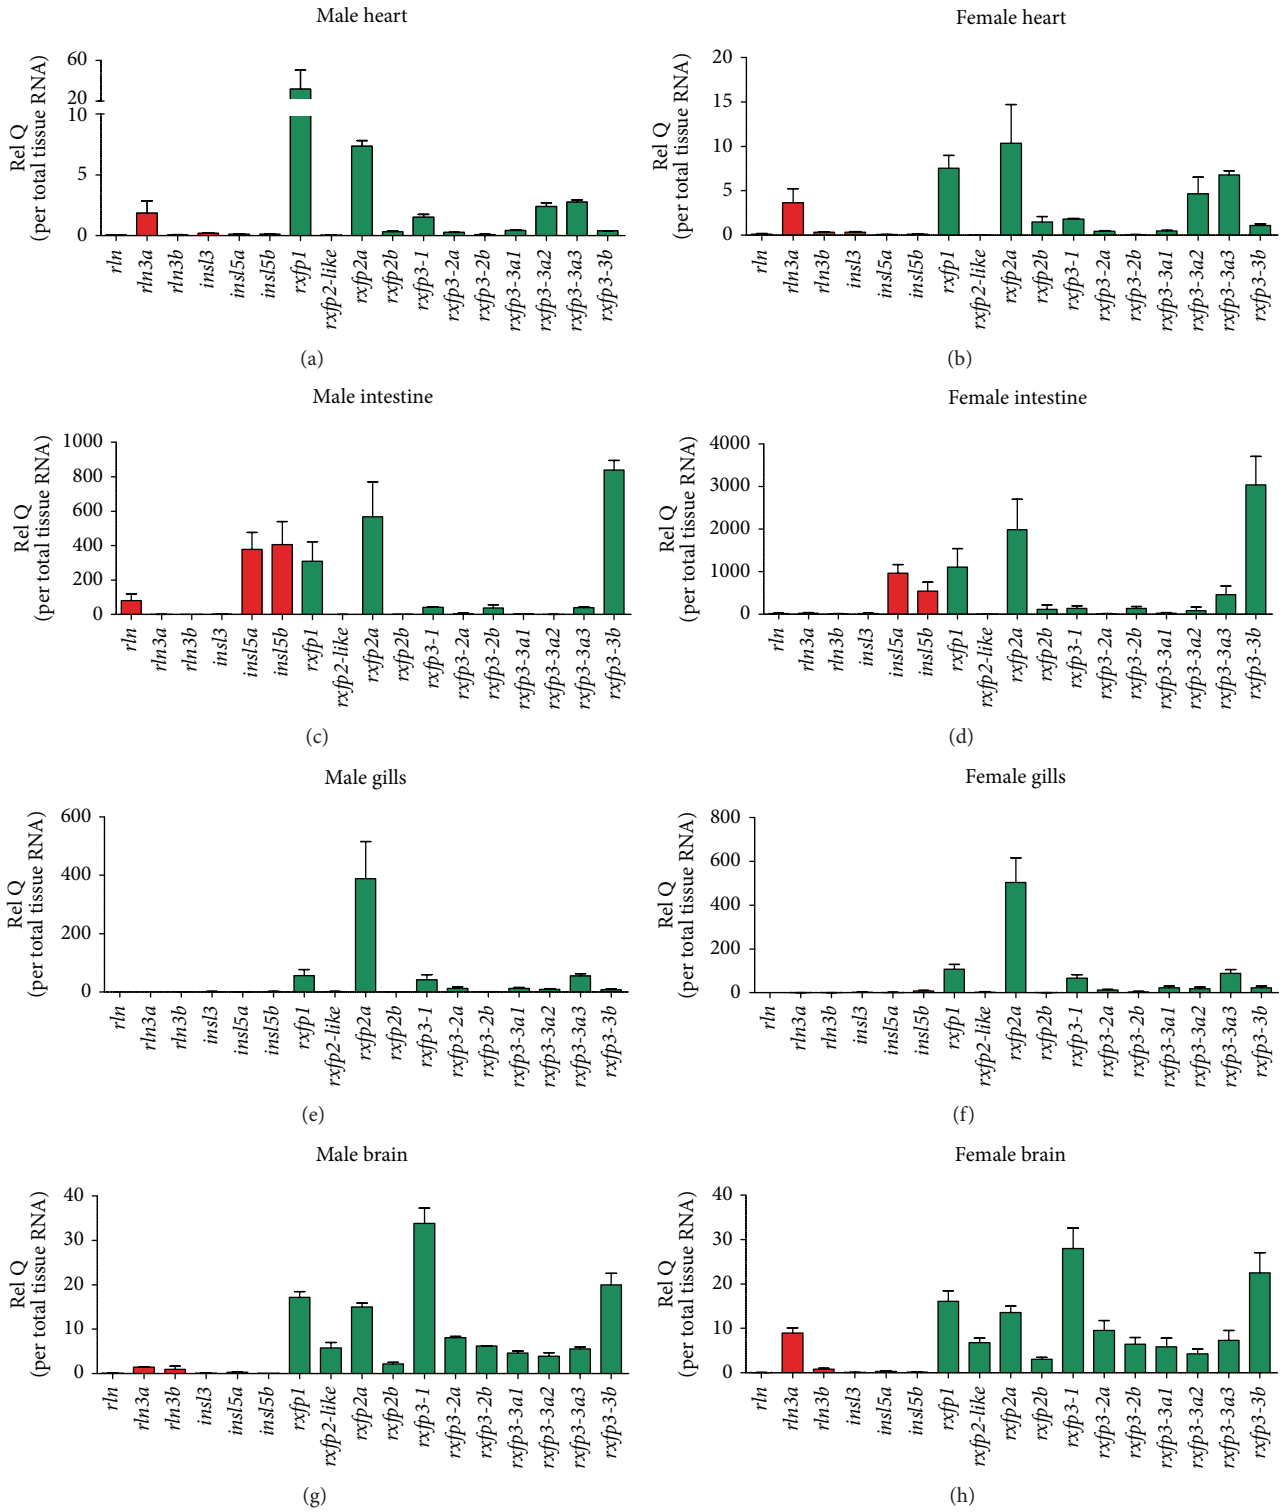

FIGURE 8: Continued.

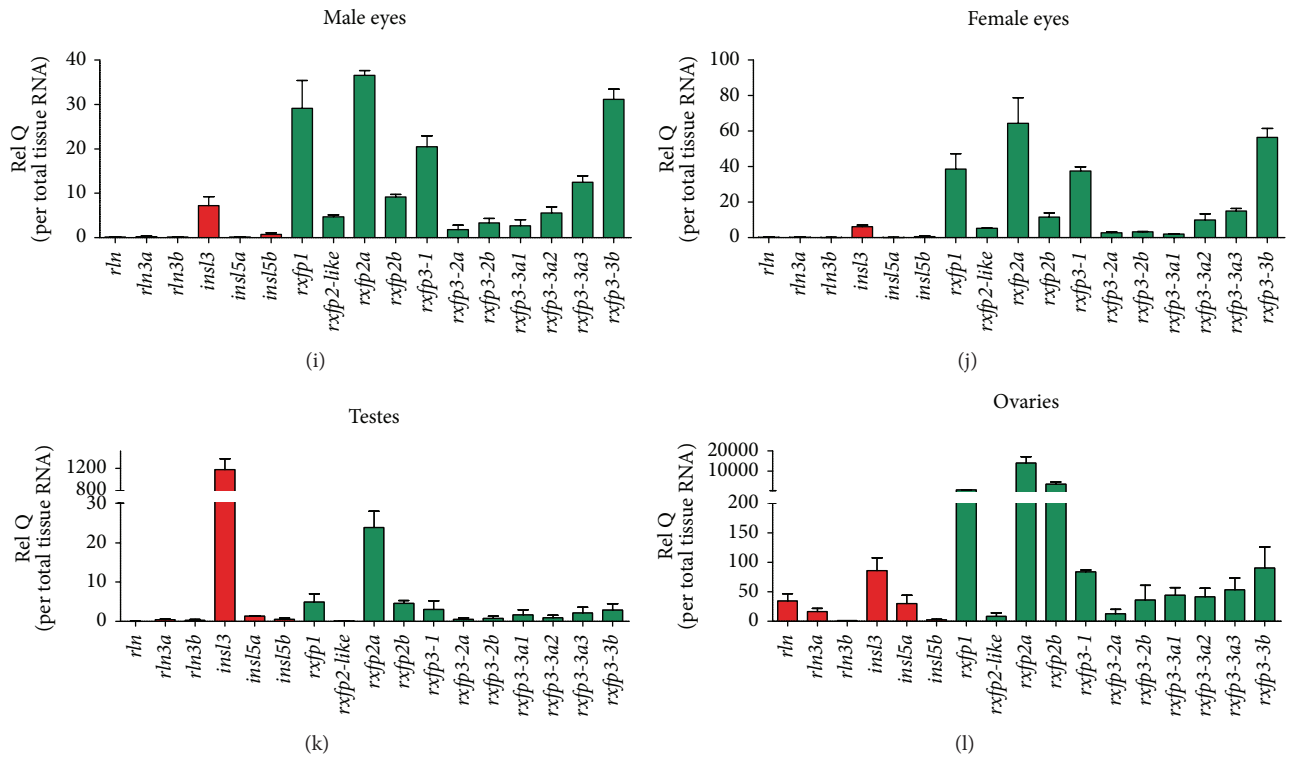

FIGURE 8: Relative expression of *rln/insl* and *rxfp* genes in zebrafish tissues. The expression of a gene relative to the average expression across all genes in a given tissue of males and females is shown. Red and green bars indicate the relative expression of the ligand and receptor genes, respectively. Three biological replicates were used to determine the standard errors on the relative expression.
