Contents

Chapter

1  General introduction 1

Part I - mouse studies

2  The effects of selective serotonin reuptake inhibitors on extracellular 5-HT levels in the hippocampus of 5-HT$_{1B}$ receptor knockout mice 17

3  Extracellular serotonin on the prefrontal cortex is limited through terminal 5-HT$_{1B}$ autoreceptors 31

4  Interactions between serotonin and dopamine in the striatum are not mediated by striatal 5-HT$_{1B}$ receptors 43

Part II - rat studies

5  An evaluation of the effects of NAS-181, a new selective 5-HT$_{1B}$ receptor antagonist, on extracellular 5-HT levels in rat frontal cortex 57

6  Role of extracellular serotonin in the effect of 5-HT$_{1B}$ autoreceptor blockade 69

7  General discussion 81
