The authors regret that there is a mistake in Figure 1. The number of cases shown in ‘‘Completed PreCaris-study’’ should not be 210, but 350. In addition, there was a mistake in the heading of Figure 1.

The revised figure and heading are shown below.

Title: Figure 1. Flowchart of the study population.

GDM, gestational diabetes mellitus; HDP, hypertensive disorder pregnancy; PTB, preterm birth. Other: maternal death, renal disease, coagulation disorders or Raynaud’s syndrome.

The authors would like to apologise for any inconvenience caused.
