Contents

Chapter 1  Introduction and aims of the study  1
Chapter 2  Review of the literature  9
Chapter 3  Sporadic lower motor neuron disease with adult onset: classification of subtypes  23
Chapter 4  A prospective study of the natural course of sporadic adult-onset lower motor neuron disease  41
Chapter 5  Hereditary pure lower motor neuron disease with adult onset and rapid progression  55
Chapter 6  Mimic syndromes in sporadic cases of progressive spinal muscular atrophy  67
Chapter 7  Multifocal motor neuropathy: diagnostic criteria that predict the response to immunoglobulin treatment  75
Chapter 8  Multifocal inflammatory demyelinating neuropathy: a distinct clinical entity?  87
Chapter 9  Demyelination and axonal loss in multifocal motor neuropathy: distribution and relation to weakness  99
Chapter 10  Disease severity in multifocal motor neuropathy and its association with the response to immunoglobulin treatment  119
