# Figures

0.1 Structure of the study  
1.1 The textile-apparel production complex  
1.2 The garment production column  
1.3 Vertical disintegration and subcontracting arrangements  
1.4 Worldwide employment in the garment industry, 1995  
1.5 Origins of garment imports for main markets  
2.1 Network spectrum of governance modes in production chains  
2.2 Cluster typologies  
3.1 Garment employment in the US and Mexico, mid 1960s and late 1990s  
3.2 Garment employment in the US and Mexico, 1988-2000 (x 1,000)  
3.3 The production locations of a branded jeans manufacturer, 1990 and 2003  
3.4 US-Mexican garment production networks  
3.5 Reconfiguration phases in the US-Mexico garment value chain  
4.1 The Laguna region, infrastructure and administrative structure  
4.2 La Laguna: the conurbation  
4.4 The Laguna region, population growth and decline  
4.5 The establishment of urban and rural garment factories in La Laguna  
4.6 Growth in urban and rural garment employment and changes in average factory size  
4.7 Employment in rural garment factories, 1999  
5.1 Product composition of the Laguna garment cluster  
5.2 Roman: a simple multi-plant company in La Laguna  
5.3 Casolco: a simple multi-plant company in La Laguna  
5.4 Lajat: a corporate multi-plant company in La Laguna
6.1 Subcontracting motivations, La Laguna
6.2 Family ties in the garment industry, La Laguna
I.1 Local production network, Roman
I.2 Local production network, Casolco
I.3 Local production network, Lajat
7.1 Decision-making responsibilities for FDI facilities
7.2 Production network of a branded manufacturer, Savane
7.3 The structure of US-Mexico garment production networks, La Laguna
II.1 The structure of the bi-national production network, Roman
II.2 The structure of the bi-national production network, Casolco
II.3 The structure of the bi-national production network, Lajat
8.1 Relative importance of company relations
8.2 Relative importance of types of denim products, La Laguna
8.3 Measures implemented to improve product quality
8.4 Main aim of introducing new technology
8.5 Location and year of establishment of rural garment factories, 1999
8.6 Location of cooperatives, locally- and foreign-owned rural garment factories
8.7 Bi-national garment value chain, late 1990s
8.8 An intra-regional shift in the bi-national garment value chain, late 1990s
III.1 Auto-evaluation on the competitive position of local garment firms
