

Contents

Part I	1
Introduction	1
1 Infinitesimal deformation theory	6
1.1 Artinian local algebras	8
1.2 Pro-representable functors	9
1.3 The tangent space and the obstruction space	12
1.4 Schlessinger's theory	17
1.5 Comparing formally smooth extensions	18
1.6 Quotients by groups	21
1.7 Quotients by formal groups	25
2 Cohomology of R-R bimodules	28
2.1 Hochschild cohomology	28
2.2 Deforming ring representations	31
2.3 Deforming filtrations on R -modules	34
3 Modules over maximal orders	38
3.1 Semi-simple algebras	38
3.2 Maximal and hereditary orders	39
4 Formal moduli of p-divisible groups	42
4.1 Deformations of p -divisible groups	44
4.2 Deformation data	46
4.3 The comparison theorem	49
4.4 The maximal order case	53
4.5 The polarized maximal order case	55
4.6 Non-rigid deformation problems	59
4.7 The p -chain case	60
5 Computing the moduli	62
5.1 Preliminary reductions	63
5.2 The commutative case	65
5.3 Maximal order in a division algebra with unramified center	67
5.4 One-dimensional formal groups	75
5.5 Canonical liftings	75
References	78

Part II	81
6 p-descent on elliptic curves	81
6.1 Introduction	81
6.2 The Kummer map	82
6.3 The case of an irreducible action on p -torsion points	86
6.4 A generalization for subfields of $K(E[p])$	89
6.5 The norm map on the image of the Kummer map	90
6.6 Local analysis of the image of $\alpha_{T,L}$	91
6.7 An example	96
References	99
Samenvatting in het Nederlands	100
